

KPA ONSITE LOSS CONTROL INSPECTION PROGRAM

Protect your company and empower your risk prevention efforts. This service combined with the proficiency of the Risk Management Center (RMC) helps you maintain an effective risk management program and reduce workers compensation costs. Take advantage of our safety experts and specialists to help you create and maintain a safety culture.

Efficient and Cost-Effective Loss Prevention Solutions

Services included in the KPA Onsite Loss Control Inspection Program:

Onsite Loss Control Consultation

We work with you to identify and diagnose risk management issues and priorities and how to solve them using the RMC. Simply identify one area of emphasis for the onsite inspection:

- **Facility Inspection**
Identify and diagnose risk management issues within your facility
- **Behavior-Based Safety Audit**
Observe job tasks and identify critical safety behaviors

Develop a Self-Inspection Schedule

Consultant works with you to create an internal self-inspection schedule within the RMC to be completed either monthly or quarterly, as well as a Safety Committee meeting schedule

Follow Up and Quarterly Calls

We follow up with one call after two weeks, and then quarterly calls from our specialists for additional training and safety program review

2 Year Term Minimum – Fees may apply.
